

# SMALL-SPACE STORAGE AUDIT

A practical room-by-room worksheet to find wasted space before you buy more storage.

**THE RULE:** Audit the space you already have first. Buy only when the problem is clear.

## 1. FIND THE SPACE YOU'RE NOT USING

Look **under, behind, above, beside, and inside** things before deciding you need another storage unit.

| Area to check                | What I found | Potential use |
|------------------------------|--------------|---------------|
| Under the bed                | _____        | _____         |
| Behind the door              | _____        | _____         |
| Top of wardrobe / cabinet    | _____        | _____         |
| Inside cabinet doors         | _____        | _____         |
| Unused wall / vertical space | _____        | _____         |
| Awkward corner               | _____        | _____         |
| Under desk / console         | _____        | _____         |

## 2. WHAT IS ACTUALLY TAKING UP SPACE?

List the five things that make the room feel most crowded. Be specific: 'clothes on chair' is more useful than 'messy room.'

|   |       |
|---|-------|
| 1 | _____ |
| 2 | _____ |
| 3 | _____ |
| 4 | _____ |
| 5 | _____ |

## 3. KEEP • MOVE • REMOVE

Choose a small batch. Use the simplest action that solves the problem.

| Item  | KEEP | MOVE | REMOVE / DONATE |
|-------|------|------|-----------------|
| _____ | ■    | ■    | ■               |
| _____ | ■    | ■    | ■               |
| _____ | ■    | ■    | ■               |
| _____ | ■    | ■    | ■               |
| _____ | ■    | ■    | ■               |

| Item  | KEEP | MOVE | REMOVE / DONATE |
|-------|------|------|-----------------|
| <hr/> | ■    | ■    | ■               |

## 4. STORAGE AUDIT

Is each storage spot working hard enough? A good solution makes everyday access easier.

| Storage spot   | What lives here? | Easy to reach? | Better use? |
|----------------|------------------|----------------|-------------|
| Closet         | _____            | ■ Yes ■ No     | _____       |
| Under bed      | _____            | ■ Yes ■ No     | _____       |
| Desk / dresser | _____            | ■ Yes ■ No     | _____       |
| Door / entry   | _____            | ■ Yes ■ No     | _____       |
| Shelves        | _____            | ■ Yes ■ No     | _____       |
| Cabinet        | _____            | ■ Yes ■ No     | _____       |

## 5. THE “DON’T BUY THIS YET” FILTER

Before buying a new organizer, answer all five. If you answer **NO** to two or more, pause the purchase.

|                                                                        |       |      |
|------------------------------------------------------------------------|-------|------|
| Do I know exactly what problem this item will solve?                   | ■ YES | ■ NO |
| Have I measured the space where it will go?                            | ■ YES | ■ NO |
| Will I use it at least weekly?                                         | ■ YES | ■ NO |
| Can I solve the problem by moving, removing, or repurposing something? | ■ YES | ■ NO |
| Will this make the room easier to use—not just fuller?                 | ■ YES | ■ NO |

### SMART STORAGE = LESS FRICTION

The best solution is the one that makes an everyday task easier, faster, or calmer.

## 6. MY ONE STORAGE PRIORITY

|                                     |       |
|-------------------------------------|-------|
| The biggest problem in this room:   | _____ |
| The space I can use better:         | _____ |
| The simplest solution to try first: | _____ |
| One thing I will NOT buy yet:       | _____ |

Space to Organize • Small spaces. Smarter living.
