

SMALL BEDROOM PLANNER

A practical 20-minute guide to make a small bedroom work harder — without buying everything new.

HOW TO USE THIS PLANNER

Measure first. Decide what must stay. Then assign every zone a job. Use the final page as your shopping filter.

1. MEASURE BEFORE YOU MOVE ANYTHING

Measurement	Your number	Why it matters
Room length	_____	Planning furniture placement
Room width	_____	Planning furniture placement
Bed width × length	_____	Protecting walking space
Largest clear wall	_____	Wardrobe / desk / storage
Door clearance	_____	Avoiding blocked movement
Window width + sill height	_____	Curtains / desk / storage

2. GIVE EACH ZONE ONE CLEAR JOB

ZONE	PRIMARY JOB	WHAT BELONGS HERE?
Bedside	Sleep + essentials	Lamp, phone, book, water
Closet	Daily clothing	Most-used clothes only
Desk / dresser	Getting ready / work	Only current-use items
Under bed	Backup storage	Seasonal or occasional items
Entry / door	Leaving + arriving	Bag, keys, jacket, shoes

3. THE SMALL-BEDROOM DECISION FILTER

Before adding furniture or storage, ask these five questions:

- Does it solve a problem I have every week?
- Can I reach it without moving three other things?

- Does it use vertical, under-bed, behind-door, or unused space?
- Can I remove or change it easily if I move?
- Will it make the room feel calmer rather than fuller?

KEEP / MOVE / REMOVE

ITEM / AREA	KEEP	MOVE	REMOVE / DONATE	WHY?
_____	■	■	■	_____
_____	■	■	■	_____
_____	■	■	■	_____
_____	■	■	■	_____

4. PLAN YOUR STORAGE — WITHOUT OVERBUYING

Start with the space you already have. Only add a product when you know exactly what it will hold.

SPACE	CURRENT USE	COULD HOLD	NEXT ACTION
Under bed	_____	_____	■ measure ■ sort ■ add bin
Back of door	_____	_____	■ measure ■ add organizer
Closet floor	_____	_____	■ sort ■ stack ■ basket
Wall / vertical	_____	_____	■ hooks ■ shelf ■ art
Awkward corner	_____	_____	■ leave open ■ use slim storage

5. YOUR IDEAL ROOM FLOW

Sketch your room simply. Mark doors and windows first, then the bed, then everything else. Keep a clear walking path.

Tip: mark the bed with a rectangle, doors with a swing arc, and windows with a double line.

6. THE 20-MINUTE RESET

MINUTES	TASK
0–5	Clear visible surfaces: bed, floor, dresser, desk.

5–10	Return daily-use items to their zones.
10–15	Move one category into hidden storage.
15–18	Remove 3 things you no longer need.
18–20	Check the walking path and make one final adjustment.

7. BEFORE YOU BUY ANYTHING

- Measure the exact space.
- Decide what the item will store.
- Check whether you already own something that can do the job.
- Leave enough clearance to open doors and walk comfortably.
- Prefer flexible, renter-friendly solutions when possible.

MY ONE PRIORITY FOR THIS ROOM

SPACE TO ORGANIZE

Small spaces. Smarter living. • Use what you have first. Buy only what solves a real problem.
